Asansol, West Bengal | krilal324@gmail.com | +91-73629XXXX | github.com/Krish033-source | linkedin.com/in/krishna-lal-5b1a22321

Summary

Machine Learning & MLOps Engineer specialising in scalable ML pipelines, AI-powered backend systems, and open-source development. Experienced in **MLflow**, **Docker**, **FastAPI**, **AWS**, and **Linux administration**. Passionate about deploying production-grade ML systems and automating data-driven workflows.

Education

Haldia Institute of Technology — B.Tech, Data Science & Engineering 2024 – Present | Haldia
CGPA: **8.87** (up to 4th Semester) | Expected Graduation: 2028

Experience

- Vice President – GRID Community** 2025 – Present
 - Led operations for a **250+ member** technical community; organised 2 industry-speaker events with end-to-end logistics.
 - Drove community growth through structured engagement programmes and outreach initiatives.
- Project Admin – ISTE Open Source 101** 2025 | Remote
 - Coordinated contributor onboarding, issue tracking, and documentation workflows across the open-source programme.
 - Facilitated collaboration between contributors and maintainers through GitHub pull requests and code reviews.
- Open Source Contributor – Resourcio Aperture 3.0 & ELUSOC** 2025 | Remote
 - Enhanced project documentation and README workflows to improve contributor onboarding in both programmes.
 - Applied Git/GitHub best practices for version control, pull requests, and distributed repository management.

Projects

- AstraFlux – AI-Powered GitHub Repository Management Platform** [GitHub](#)
 - Built intelligent repo-management platform with **GitHub OAuth**, automated auditing, and AI-assisted analysis workflows.
 - Developed **FastAPI** backend services and **PostgreSQL** storage; deployed on **Linux** with Bash automation.**Tools:** Python, FastAPI, GitHub API, PostgreSQL, Linux
- Smart Water-Borne Disease Alert System – ML Prediction System** [GitHub](#)
 - Processed health datasets with **Pandas/NumPy**; engineered features and trained **Scikit-Learn** classifiers for early-risk detection.
 - Designed analytics dashboards to support data-driven community health decision-making.**Tools:** Python, Pandas, NumPy, Scikit-Learn
- CV Analyzer – ML-Powered Resume Analysis System** [GitHub](#)
 - Automated candidate profile extraction and JD-matching pipeline using **Scikit-Learn** and NLP techniques.
 - Reduced manual screening effort with scoring workflows built on **Pandas** data processing.**Tools:** Python, Scikit-Learn, Pandas
- MorphCrypt – Secure Encryption Utility** [GitHub](#)
 - Implemented cryptographic file-protection workflows using Python security libraries and **Linux**-based security practices.
 - Automated secure file processing with **Bash scripting** for system-level administration tasks.**Tools:** Python, Linux, Bash

Skills

Languages:	Python, C, Bash, SQL
Machine Learning:	NumPy, Pandas, Scikit-Learn, Feature Engineering, Model Evaluation
MLOps:	MLflow, Docker, FastAPI, Git, GitHub, CI/CD
Cloud & DevOps:	AWS, Linux Administration, Bash Scripting
Soft Skills:	Leadership, Team Management, Public Speaking, Community Building

Achievements

- 1st Position** – InnovateX Hackathon 2025
- 3rd Position** – National Level Ideathon 2025
- Participant** – Smart India Hackathon (SIH) 2025
- Project Admin** – ISTE Open Source 101 | **Contributor** – Resourcio Aperture 3.0 & ELUSOC

Conferences & Events

Bitcoin India Conference 2025 (Attendee) | Buildathon Kolkata 2025 (Attendee) | Diversion 2026 (Participant)
