Asansol, West Bengal | krilal324@gmail.com | +91-73629XXXXX | github.com/Krish033-source | linkedin.com/in/krishna-lal-5b1a22321

SUMMARY

Machine Learning & MLOps Engineer specialising in scalable ML pipelines, AI-powered backend systems, and open-source development. Experienced in MLflow, Docker, FastAPI, AWS, and Linux administration. Passionate about deploying production-grade ML systems and automating data-driven workflows.

EDUCATION

Haldia Institute of Technology — B.Tech, CSE - Data Science 2024 – Present | Haldia
CGPA: 8.85 (up to 4th Semester) | Expected Graduation: 2028

EXPERIENCE

- Vice President – GRID Community** 2025 – Present
- Led operations for a 2000+ member technical community; organised 2 industry-speaker events with end-to-end logistics.
 - Drove community growth through structured engagement programmes and outreach initiatives.
- Technical Member – ISTE** 2025 – Present
- Served as a Technical Member of the institution's ISTE chapter, supporting technical initiatives and events.
 - Volunteered and coordinated 8+ technical events, handling planning, logistics, and on-ground execution.
- Project Admin – ISTE Open Source 101** 2025 | Remote
- Coordinated contributor onboarding, issue tracking, and documentation workflows across the open-source programme.
 - Facilitated collaboration between contributors and maintainers through GitHub pull requests and code reviews.
- Open Source Contributor – Resourcio Aperture 3.0 & ELUSOC** 2025 | Remote
- Enhanced project documentation and README workflows to improve contributor onboarding in both programmes.
 - Applied Git/GitHub best practices for version control, pull requests, and distributed repository management.

PROJECTS

- GitSetLive – AI-Powered GitHub Repository Management Platform** GitHub
- Built intelligent repo-management platform with GitHub OAuth, automated auditing, and AI-assisted analysis workflows.
 - Developed FastAPI backend services and PostgreSQL storage; deployed on Linux with Bash automation.
- Tools: Python, FastAPI, GitHub API, PostgreSQL, Linux*
- Smart Water-Borne Disease Alert System – ML Prediction System** GitHub
- Processed health datasets with Pandas/NumPy; engineered features and trained Scikit-Learn classifiers for early-risk detection.
 - Designed analytics dashboards to support data-driven community health decision-making.
- Tools: Python, Pandas, NumPy, Scikit-Learn*
- CV Analyzer – ML-Powered Resume Analysis System** GitHub
- Automated candidate profile extraction and JD-matching pipeline using Scikit-Learn and NLP techniques.
 - Reduced manual screening effort with scoring workflows built on Pandas data processing.
- Tools: Python, Scikit-Learn, Pandas*
- MorphCrypt – Secure Encryption Utility** GitHub
- Implemented cryptographic file-protection workflows using Python security libraries and Linux-based security practices.
 - Automated secure file processing with Bash scripting for system-level administration tasks.
- Tools: Python, Linux, Bash*

SKILLS

Languages: Python, C, Bash, SQL, R, JavaScript
Machine Learning: NumPy, Pandas, Scikit-Learn, Feature Engineering, Model Evaluation, Deep Learning, LLMs, RAG
MLOps: MLflow, Docker, FastAPI, Git, GitHub, CI/CD
Cloud & DevOps: AWS, Linux Administration, Shell Scripting
Soft Skills: Leadership, Team Management, Public Speaking, Community Building

ACHIEVEMENTS

- 1st Position – InnovateX Hackathon 2025
- 3rd Position – National Level Ideathon 2025
- Participant – Smart India Hackathon (SIH) 2025
- Project Admin – ISTE Open Source 101 | Contributor – Resourcio Aperture 3.0 & ELUSOC

CONFERENCES & EVENTS

Bitcoin India Conference 2025 (Attendee) | Buildathon Kolkata 2025 (Attendee) | Diversion 2026 (Participant)
